Hiring Manager,
Lenovo

Dear Hiring Manager,

I am excited to apply for the Data Analytics position at Lenovo. As a computer science student, I am eager to apply my technical skills and problem-solving abilities to real-world challenges. Lenovo's mission of transforming ideas into knowledge through innovation aligns perfectly with my passion for software development, data analysis, and collaborative problem-solving.

Through my coursework and research, I have gained experience in Java, C, and Python, with a focus on software development, algorithm design, and data analysis. My work on sea ice extremes and their impact on atmospheric patterns using computational models has strengthened my ability to analyze large datasets, extract insights, and contribute to scientific research. Additionally, working on team-based projects has reinforced my collaboration, adaptability, and problem-solving skills—qualities that I am eager to bring to Lenovo.

I am excited about the opportunity to gain hands-on experience and further develop my technical expertise by learning from professionals in the field. I welcome the chance to discuss how my skills and experiences align with Lenovo's goals.

Thank you for your time and consideration. I look forward to the opportunity to contribute to Lenovo's work.

Sincerely,
Mihir Kulkarni
